Flowchart maker reddit

www.code2flow.com I'm using this currently. It's a site that uses pseudocode to create flowcharts. I like that it is dynamic in the sense that I can randomly add code to any part and it will update the chart. I also like that it is very simple to learn and use. I'm using it as a tool for studying for my medical board exams because I enjoy the logic of coding and don't enjoy memorizing stuff. In a sense, I'm tricking myself into studying. My question: Is there a program that I can download that can do the same thing but better? I don't know much about programming. I tried using MS Visio with a graphviz addon but it did not work (the addon failed with the latest version of Visio I believe). This is what it looks like for the module I'm working on but I'm still missing a LOT of information. The site is causing my computer to slowdown at times too. I feel like a program running from my computer would be much better. Thanks! Page 2 7 comments As the post says, I'm looking for a free tool for making mind maps/flow charts. I need something to layout dialogue trees and game paths. I was previously using lucid charts, which served me perfectly. However, I was fraudulently charged \$540 with no customer support response. I'm currently in college and my professors love their flowcharts. I am finally fed up with making them in paint. So can anyone tell me of good free software to make flowcharts. GIMP doesn't count. Page 2 73 comments What is your favorite software for creating campaign flowcharts? I did a search but couldn't find this question asked in this subreddit before. Page 2 17 comments What is the best free flowchart software for making flowcharts of programs, it would be useful if it had keyboard shortcuts to add blocks as I find it much faster. Page 2 52 comments Hi, I'm looking for some sort of open-source/free flowchart creator. I tried software bundled with likes of LibreOffice, but those are abysmal. This is why I'm looking for free and standalone solutions. Any ideas? I don't really want to spend any money on pro software. PS. Online creators are out of the question. I need offline access to my files. Page 2 13 comments
